EDUCATION

Bachelor of Technology Computer Science Vishwakarma Institute of Technology, Pune

08/2019 - Present

CGPA-8.26

EXPERIENCE

BoltIOT Pvt Ltd(Bangalore,India) Web Development Intern

04/2022 - 05/2022

Remote

Tasks

- Trained and Worked on Web development projects
- Certificate of Training and Intern
- Work on front End part using React Js

Currently Working On

- GST Billing Software Using React ,Spring-Boot and Oracle
- Cryptocurrency Price Prediction using Deep Learning

Lasso Regrassion, Crypto coins, Bitcoin, Deep Learning

Technical skills

•

• **Technologies:** Web Development, Machine Learning, ReactJS, Android Development, Flask, Flutter Framework, MySQL

• **Relevant Courses:** Data Structures, Algorithmic Analysis, Operating Systems, Database Management Systems, Computer Networks, Artificial Intelligence, Data Science and Machine Learning, Compiler Design, Software Engineering Tasks

- [Amcat test Certificate](#)

LANGUAGES

CPP

Python

Java

PHP

SQL

JavaScript

Web Development

Sql

Data Structure & Algorithm

PROJECTS

- Crop Prediction System :Machine Learning,Python,Flask

- Model will predict Which plant should grow in farm.
- check soil element and Environment conditions.
- trained model on considering 4 machine learning algorithms. (KNN, Naive Bayes, Decision Classifier)

- Entertainment Hub: React Js, Themoviedb API, MySQL

- Project it is entertaining channel like hotstar
- There is Treanding news, Movies, Series and Searching System
- Working On adding Sports system components

- Real Estate Price Prediction: ML, Python

- This is the Website build using flask and python. For Prediction used Machine Learning algorithm K-nearest algorithm
- Technology Used Python, ML Algorithms and Flasks

- FingerPrint Authentication Online Voting System

- Android studio, java, JDK, Biometrics Firebase database, FingerPrint based library and Java Packages.
- Online voting system is an Android application used to securely conduct votes and elections.
- Firebase ML kit for face detection which allows us to vote, one person at a time. This application also verifies biometric with the help of finger print.

- React-Crypto-App: Reactjs, Coing Gecko for API

- Users can get daily price updates of the crypto coins
- Users Can Search particular coin price

ACHIEVEMENTS / CO-CURRICULAR

IEEE MEMBER, VIT, Pune.

Attended different types of projects webinar and Hackathon.

Solved 800+ Problem across Leetcode, GeeksForGeeks, and HackerEarth.

The Robotic Forum (TRF) Member, VIT, Pune.

Weekly Leetcode and HackerEarth Contest

Seven Code You Tube Channel

-Teaching and Solving competative Programming

Blogging

-30+ Educational languages blog
